# CSA1708-ARTIFICIAL INTELLIGENCE

# LAB EXPERIMENTS

**Program 19:** Write a Prolog Program for STUDENT-TEACHER-SUB-CODE.

**Aim:**

To write and execute a Prolog program to create a database containing student names, teacher names, subject names and subject codes, and retrieve the details using queries.

**Algorithm:**

1. Start the program.
2. Define student details.
3. Define teacher details.
4. Define subject names and subject codes.
5. Create rules to retrieve the corresponding information.
6. Execute queries to display student, teacher and subject details.
7. Stop the program.

```
10 ?- emacs_consult_and_remove('C:/Users/navit/AppData/Local/Temp/xpce3').
true.

11 ?- student_details(101, Name, Teacher, Subject, Code).
Name = 'Arun',
Teacher = 'Ravi',
Subject = 'Artificial Intelligence',
Code = 'AI101'.
```

## Result:

Thus, the Prolog program to create a Student-Teacher-Subject-Code database and retrieve the corresponding details was successfully written and executed.
